

# Eden Park Medical Practice Privacy Notice – Emergency Care Summary

**Plain English explanation** The Emergency Care Summary (ECS) is an Northern Irish NHS development. It consists of a basic medical record held on a central government database on every patient registered with a GP surgery in Northern Ireland. The basic data is automatically extracted from your GP’s electronic record system and uploaded to the Northern Ireland Electronic Healthcare Record (NIECR). The basic upload consists of current medication, allergies and details of any previous bad reactions to medicines, the name, address, date of birth and NHS number of the patient.

As well as this basic record additional information can be added, and this can be far reaching and detailed. However, whereas the basic data is uploaded automatically any additional data will only be uploaded if you specifically request it and with your consent. This is known as the Key Information Summary (KIS). This will normally be done for patients whose care is more complicated and sharing of the extra information would be beneficial for example those with end of life care needs or dementia.

Emergency Care Summaries can only be viewed within the NHS on NHS networked and secure computer screens or by organisation, such as the out of hour’s services, contracted to the NHS.

You can find out more about the ECS here <https://www.nidirect.gov.uk/articles/emergency-care-summary-record> and the NIECR at <http://www.ehealthandcare.hscni.net/niecr/niecr.aspx>.

You have the right to object to our sharing your data in these circumstances and you can ask your GP to block uploads.

\* “Common Law Duty of Confidentiality”, common law is not written out in one document like an Act of Parliament. It is a form of law based on previous court cases decided by judges; hence, it is also referred to as ‘judge-made’ or case law. The law is applied by reference to those previous cases, so common law is also said to be based on precedent.

## **Eden Park Medical Practice Privacy Notice – Emergency Care Summary**

The general position is that if information is given in circumstances where it is expected that a duty of confidence applies, that information cannot normally be disclosed without the information provider's consent.

In practice, this means that all patient information, whether held on paper, computer, visually or audio recorded, or held in the memory of the professional, must not normally be disclosed without the consent of the patient. It is irrelevant how old the patient is or what the state of their mental health is; the duty still applies.

Three circumstances making disclosure of confidential information lawful are:

- where the individual to whom the information relates has consented;
- where disclosure is in the public interest; and
- Where there is a legal duty to do so, for example a court order.
